OBJECTIVE

Frontend Developer with 3 years of experience in Akuna Technology, seeking full-time MERN stack developerroles.

SKILLS

Frontend JavaScript, React, Redux, Shopify[liquid], HTML, CSS, Tailwind

Backend Node, Express, MongoDB, Mongoose, REST APIs

EXPERIENCE

Frontend Developer   March 2022 - Present
Akuna Technology   *Mysore*

- Built and optimized high-performance React.js applications with responsive UI designs, leading to improved user experience and Optimized page load time.
- Developed reusable components and custom hooks using React.js, reducing code redundancy and speeding up new feature development.
- Integrated RESTful APIs to manage dynamic content and enable seamless data flow between front-end and back-end services.
- Implemented advanced state management using Redux and Context API, ensuring efficient handling of complex app states and boosting application performance.
- Design and Customize Shopify themes to create a unique and functionality online store experience. Also Troubleshoot and fix technical issues related to the Shopify store.
- Integrated third-party applications and services with the Shopify platform using APIs and webhooks. Also Optimize store performance for speed and user experience.

PROJECTS

Shopify work Projects

- Designed and developed dozens of e-commerce website, given seamless user experience. Focus on creating intuitive navigation, fast loading times, and responsive designs that engage users across devices, ultimately driving conversions and customer satisfaction.
- Below are some of worked sites.
  Lunalux Beauty | **Legoe Heritage** | **In2Green** | **White Horse Coffee** | **Zyphr** | **Dr.MartensRepair**

Vivid Eden – Tech Stack: React | Styled Component | JavaScript | Supabase   GitHub - Live

- It is mainly about Hotel management Admin dashboard, include features like adding/updating/deleting hotel room CRUD operation, check the customers check-in & check-out, also can delete the bookings.
- In dashboard you can check the activities like total booking, sales, check ins, sales graph, stay duration chart and many more.

Adventure Tour - Tech Stack: Node | Express | MongoDB | Mongoose | REST APIs | Pug.js   GitHub - Live

- This project is about authentication and authorization and checkout, where user can book a tour, used Stripe for payment method. Once booked user can check bookings in MY BOOKINGS.
- Added feature for User, where one can add image, update user name, mail address and also update password.

EDUCATION

Bachelor of Electrical & Electronics, Vidyavardhaka college of Engineering   AUG 2013 – JULY 2017
